Manufacturing

- Designed to guarantee competitive costs for production and maintenance.
- Industrialized components.
- All parts compatible for EU homologation.

Driver Protection

Three point safety belt

Driver Protection Lightweight composite body

Transport Lockable trunk

Driver Protection Side protection device

Rear wheel High-torque in-hub electric motors

Performance 72V power battery

Coated steel frame for high safety

State-of-the-art industrial production processes and strict quality control guarantee identical specification for each Vehicle.

Specification

Top Speed:	80 Km/h
Weight:	270Kg
Range:	80-100 Km
Battery System:	72V Lithium Ionen
Seat:	1
Charger:	on board
Frame:	Steel Tube
Wheels:	13″
Motor:	DC Wheel Motor
Power:	11 kW (14 PS)

Safe and reliable charging process

- The battery can be charged with an extendable spiral cable.
- The integrated charger is compatible with roadside battery charging facilities as well as the standard 220 V 10 A household electrical supply.
- Charging an empty battery takes around three-and-a-half hours.
